ANNOUNCEMENT

On the resurgence of the Covid-19

Current statistics confirm the nationwide resurgence of massive propagation of Covid-19, a situation probably due to a new virus strain which is more virulent and seems to affect and even kill an increasing number and younger people than before. Reliable information suggest that young people around or even below their 20s have died from Covid-19.

Our community is seriously concerned, with many sick students et teachers, and above all, one confirmed death. This situation is caused by the failure by most to respect the barrier-measures, the attendance of crowded events, and the denial of Covid-19 cases and deaths by patients and their families, despite the government call to more vigilance.

The Vice Chancellor of the University of Dschang hereby exhorts all members of the university community to individually and collectively revive the barrier-measures recommended by the Minister of State, Minister of Higher Education, with more rigour than ever. Students are specifically called upon to stop perpetuating the illusion that they are spared from Covid-19 which they think is a “disease of the elderly”. We are all concerned. It is therefore our high interest to :

- Avoid crowds ;
- Absolutely and appropriately wear a mask covering the nose, the mouth and the chin all the time;
- Have the minimum material for hand hygiene (hydroalcoholic gel);
- Respect a distance of at least 1m between people, while keeping the facial mask appropriately;
- Wash hands with running water and soap, or disinfect them with hydroalcoholic gel as many times as one get in contact with an object or a surface that is shared with others;
- Regularly clean all shared surfaces with hydroalcoholic gel;
- Avoid sharing commonly used material;
- Sensitise and encourage others to follow preventive measures against Covid-19.

The Vice Chancellor counts on the responsibility and discipline of each and everyone, so that we can all be spared by this new wave of Covid-19.
